LEONARDO ALVES

Software Development Student | Aspiring Software Engineer

+351 913 958 525 · 16alves02@gmail.com · Oliveira de Azeméis, Portugal
GitHub: github.com/16alves02 · Portfolio: 16alves02-com.vercel.app · LinkedIn: linkedin.com/in/16alves02

PAID CURRICULAR INTERNSHIP · 680 HOURS · START: FEBRUARY 2027 · COIMBRA

Open to on-site, hybrid or remote opportunities.

PROFESSIONAL PROFILE

Software Development student at Escola Superior Aveiro Norte, University of Aveiro (2025-2027). I am building my path towards software engineering through projects that explore full-stack applications, APIs, databases, asynchronous processing and mobile development. I am looking to join a development team, learn from experienced engineers and contribute to real products and systems.

TECHNOLOGIES USED IN PROJECTS

Frontend
React, TypeScript, JavaScript, HTML5, CSS3, Vite, React Router, Tailwind CSS, Framer Motion

Backend & APIs
PHP, PDO, APIs REST, Next.js Route Handlers, Node.js (runtime)

Data & processing
SQL, MySQL, MariaDB, PostgreSQL, Prisma, Redis, BullMQ

Mobile & testing
Kotlin, Android, Capacitor, Zustand, Vitest, C

Tools
Git, GitHub, Docker Compose

AREAS BEING DEVELOPED

Software architecture, API design, full-stack systems, asynchronous processing, testing and code quality.

EDUCATION

CTeSP in Software Development
ESAN · University of Aveiro
2025-2027 · In progress

Professional Course in IT Systems Management and Programming
Escola Secundária Dr. Serafim Leite
2020-2023

LANGUAGES

Portuguese: native
English: intermediate
Spanish: basic

SELECTED ENGINEERING PROJECTS

SaborGest
Academic project · in development
Management system for food businesses combining a web panel, REST API, database and Android kiosk. Scope includes scheduling, attendance and stock management. Still under integration and validation; not production-ready.
PHP 8.3 · PDO · REST · MySQL/MariaDB · Kotlin/Android

RunLattice
Prototype · in development
Workflow automation prototype with a visual editor, graph validation, PostgreSQL persistence and a Redis/BullMQ queue. The worker currently simulates workflow traversal; external integrations, authentication and workspace isolation are not implemented.
Next.js · React · TypeScript · PostgreSQL · Prisma · Redis · BullMQ

MRDR.
Original game · in development
Web/mobile-oriented deduction game with a modular engine, case generation and validation, campaign and local progression. Project documentation describes 200 cases and automated tests for rules and solution validation.
React 19 · TypeScript · Vite · Zustand · Vitest · Capacitor

RAW.
Interactive application · personal project
Conversation and social-game application with distinct modes, card interaction, swipe gestures and animated transitions. Explores content organisation, localisation and a mobile/PWA experience.
React · JavaScript · Tailwind CSS · Framer Motion

SOFTWARE DEVELOPMENT EXPERIENCE

Desenvolvimento Backend | ClickBeauty / Alvocromático · Apr-Jul 2023
Developed backend functionality with PHP and MySQL, supported internal web systems and maintained existing code.

Estágio de Desenvolvimento Web | Associação Estamos Juntos (AEJ) · Jul 2022
Built a website with HTML, CSS, JavaScript and PHP, including database integration for registration workflows.

ADDITIONAL PROFESSIONAL EXPERIENCE

CNC Machine Operator · Schmidt Light Metal Group (Feb 2025-May 2026) | Store Operator · MC (May-Aug 2024)
